

# Project Planning

# Topics!

- Parameterize the Generation of Realistic Faces
  - G1, G2, G5, G7
- Inducing Emotions in Virtual Reality by Changing the Appearance of the Avatar
  - G1, G6
- Deep Labeling of Motion Capturing Markers
  - G1, G2, G8
- Training a Mouse Transfer Function using Reinforcement Learning
  - G2, G3, G5, G7, G8, G9
- Curve 2.0
  - G3
- Socially Acceptable and Usable Text Presentation in Augmented Reality (in Smart Glasses)
  - G3, G4, G6
- Tracking Paper Files
  - G4, G7
- The Effect of Real-Time Translated Text Position on Hand-held AR Devices
  - G4, G5, G6, G8, G9

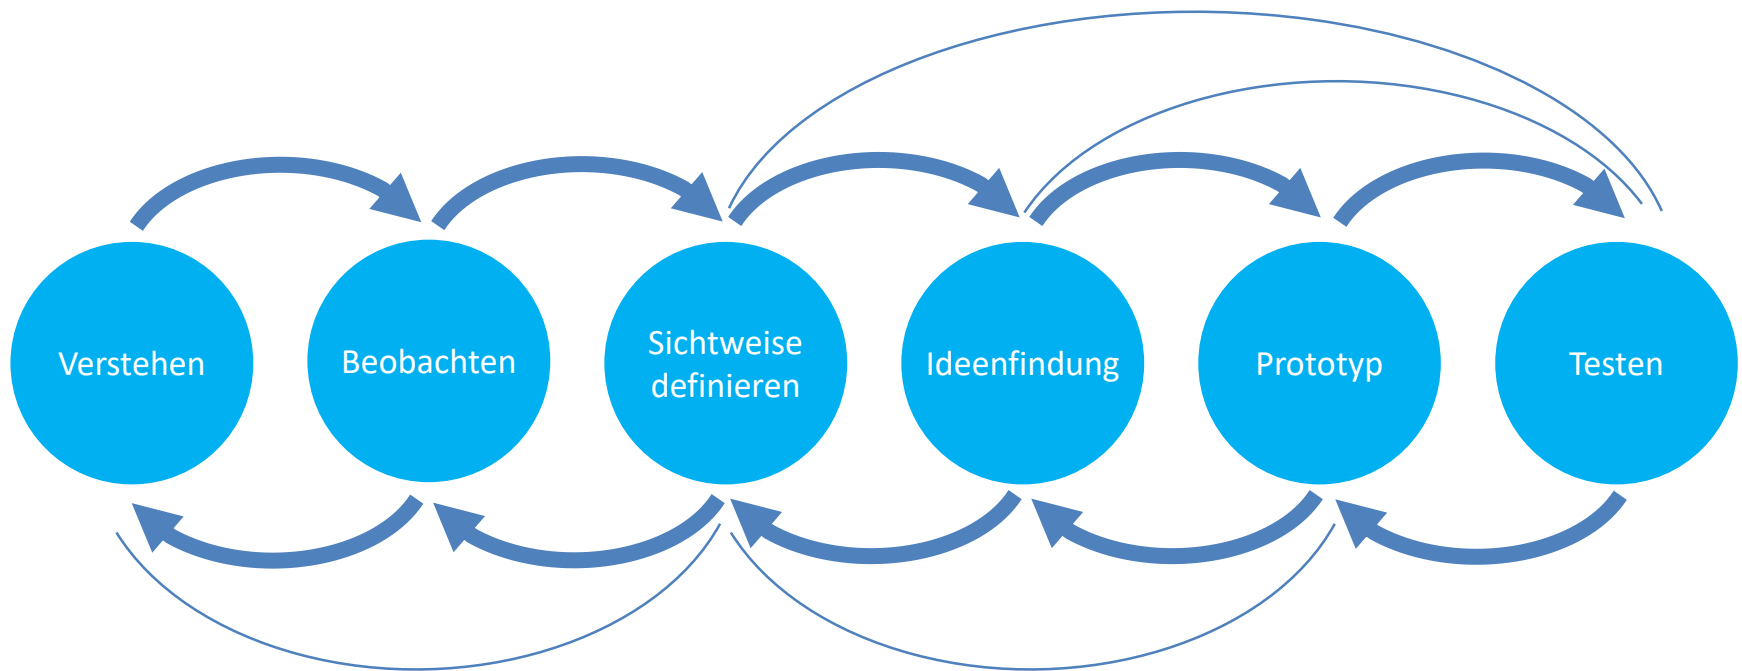

# Project

- Deadline: 30.9.
- Projektmanagement: SCRUM!
  - Search a project management tool of your choice
    - Z.B. [taiga.io](https://taiga.io), JIRA, ASANA, ScrumDESK, Trello
  - Create a set of user stories
    - What are the (our+your+user) requirements for your project?
  - Choose your management framework
  - Prototype/MVP requirement analysis
    - What are the most important aspects that must be covered by your prototype?
    - Which tools do you need to develop your prototype?

# Tasks for next week

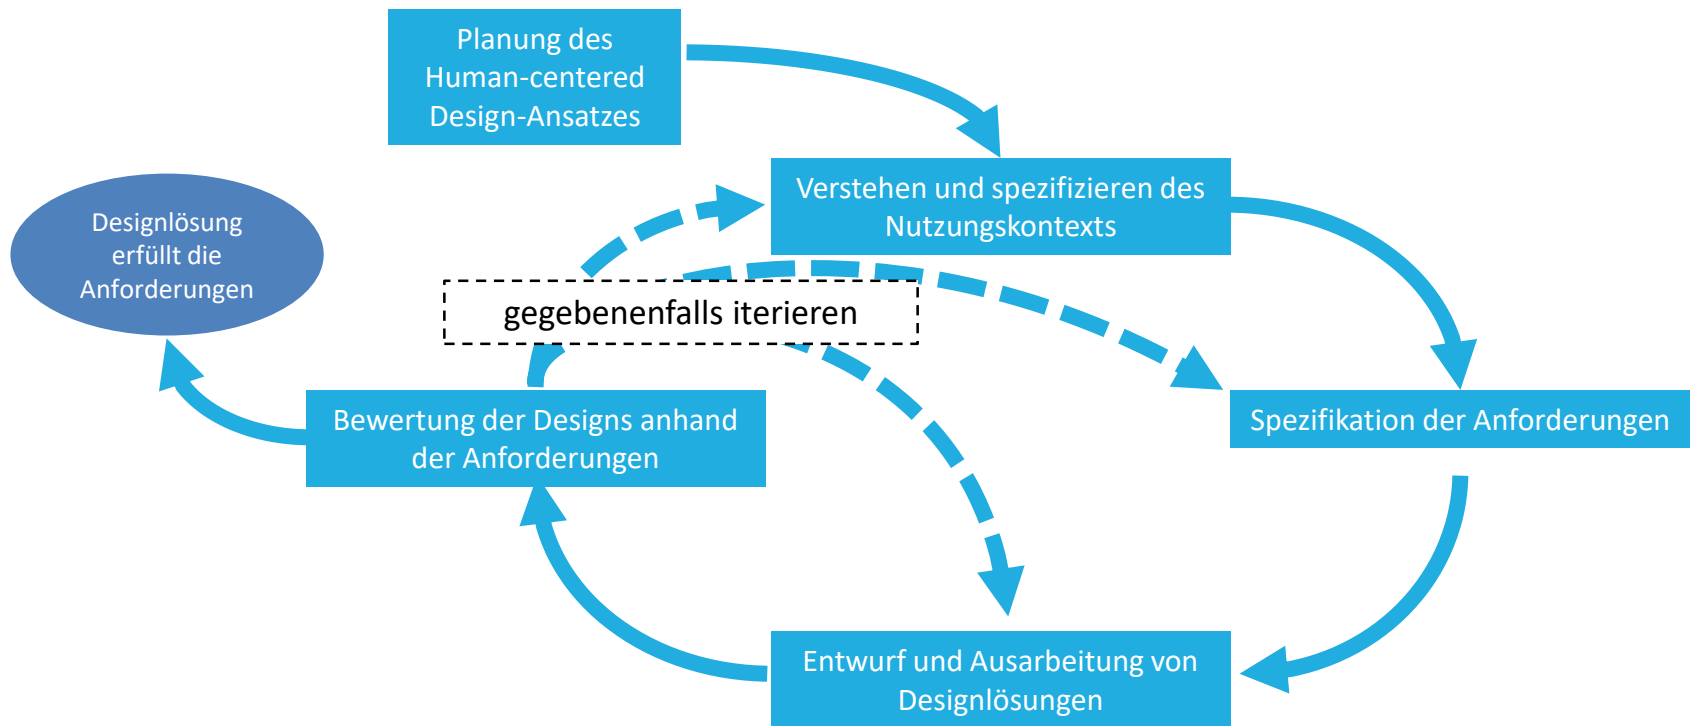

- Present your project
  - Give an overview
  - What's your focus?
  - Present your project plan, user stories, requirements
  - What are your hypotheses?
  - What do you need (from us) to test your hypotheses?

# Design Thinking

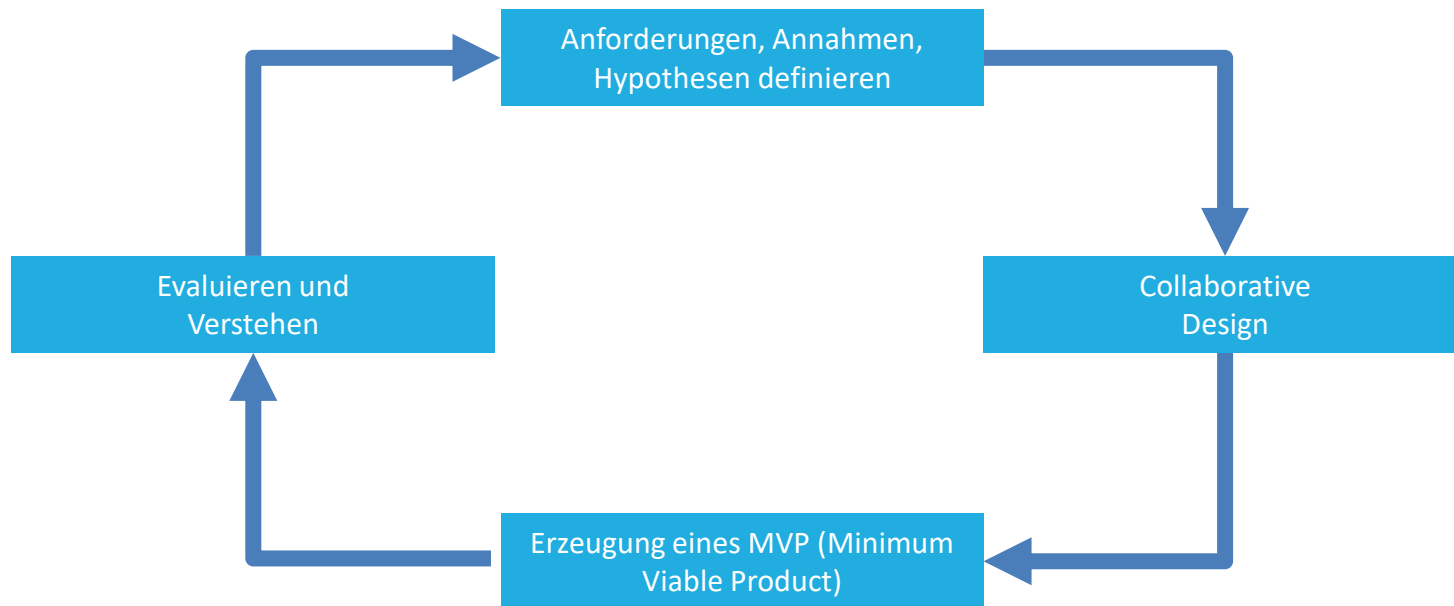

The Design Thinking process, referring to an Anja Wölbling, Kira Krämer, Clemens N. Buss, Katrin Dribbisch, Peter LoBue, and Abraham Taherivand 2012. "Design Thinking: An Innovative Concept for Developing User-Centered Software", in Software for People, Mädche, Alexander (eds.), Berlin: Springer, pp. 121ff.

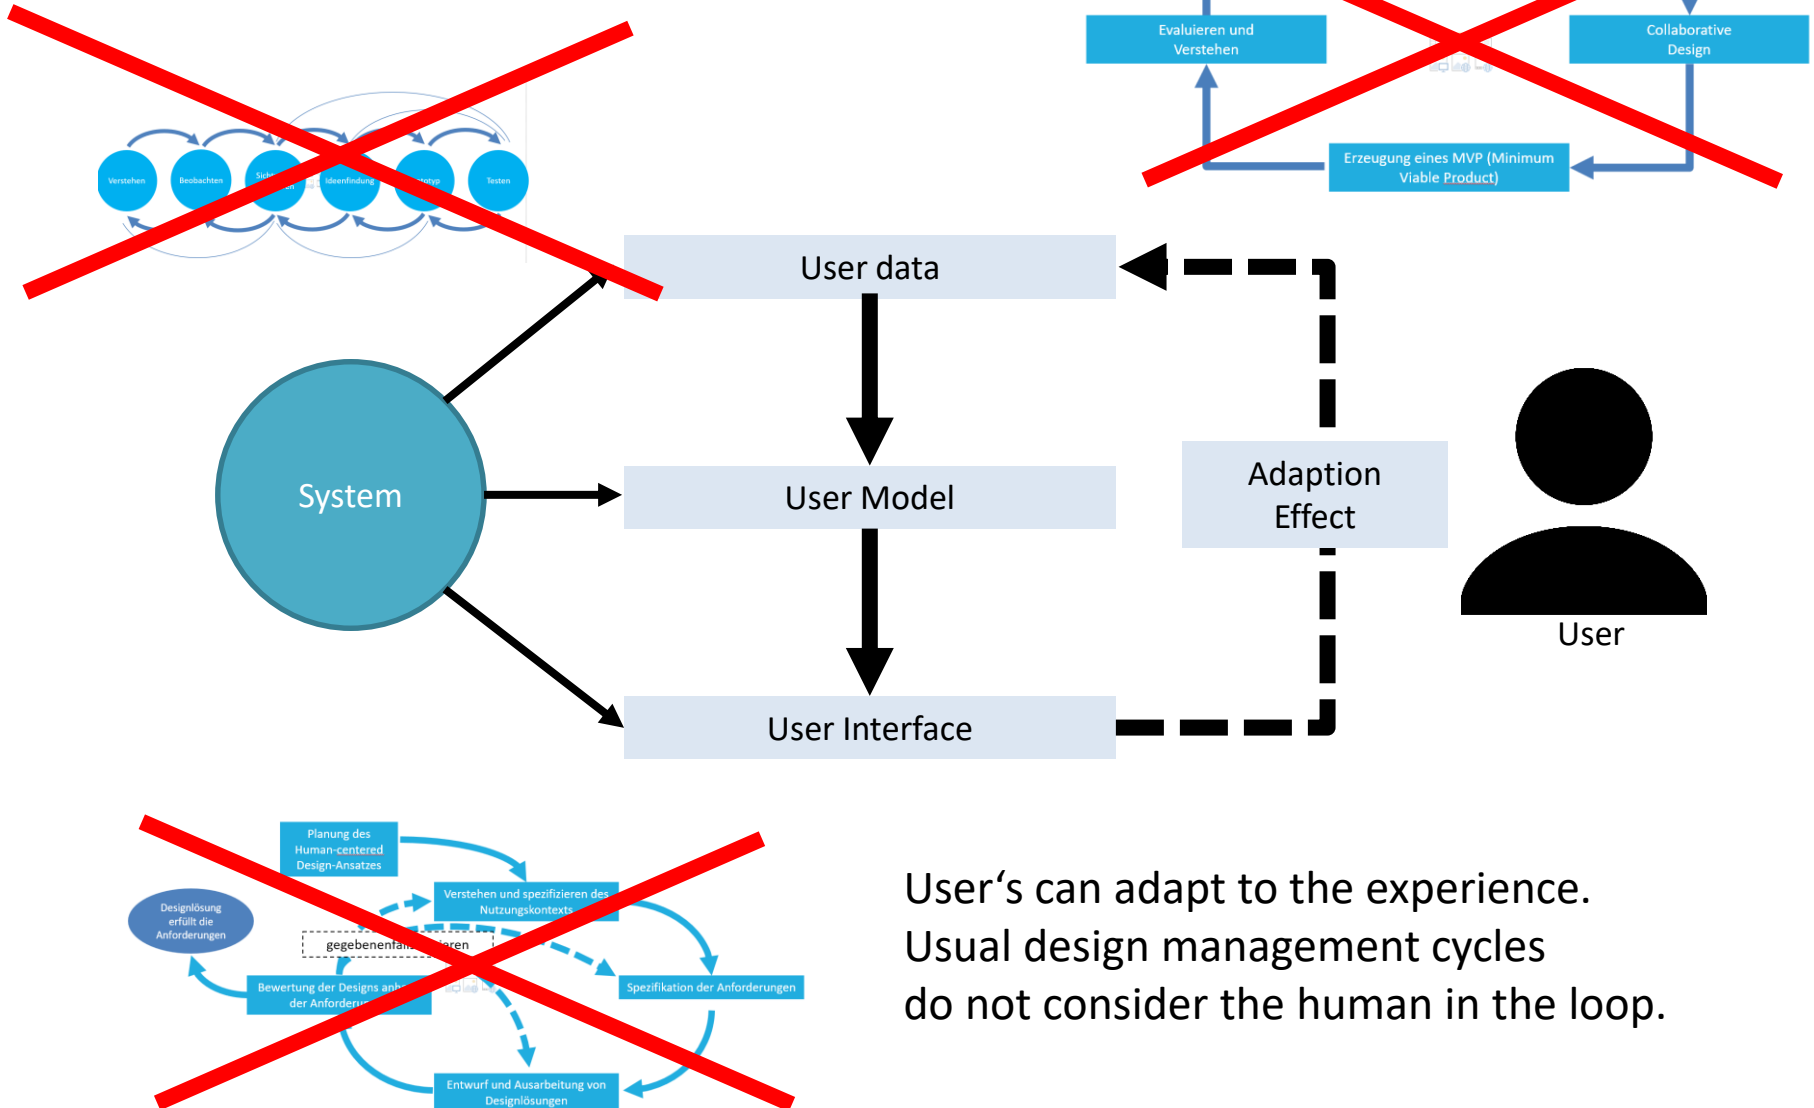

# Human-Centered Design

# Lean UX

# The-Human-in-the-Loop

User's can adapt to the experience.  
Usual design management cycles  
do not consider the human in the loop.
